### SUMMARY

---

Creative, detail-oriented software engineer with a proven track record of developing and implementing successful front and back-end web applications. I value constant learning and improvement, and love to share what I learn. I'm looking to bring my skills, diverse perspective, and growth mindset to a company working on interesting problems.

### PROJECTS

---

#### Con Sazon ([consazon.herokuapp.com](https://consazon.herokuapp.com)) [🔗](#)

Users can browse recipes, upload custom recipes, create meal plans, and get printable shopping lists from created meal plans. Integrated with Zestful, a third-party REST API, and several NPM packages including Math.js and Moment.js. Technical specification is available on my portfolio.

#### MintJack ([mintjackreact.herokuapp.com](https://mintjackreact.herokuapp.com)) [🔗](#)

A full-stack MERN blackjack game created during a Mintbean hackathon.

#### Other Projects

Expense tracking web app, Jasmin's Salon website, SpaceX Launch Finder web app, Nungram social media site.

### PROFESSIONAL EXPERIENCE

---

#### Software Engineer

100Devs Bootcamp

10/2020 – present  
Los Angeles, CA

- Collaborate with a team to build responsive web applications, applying agile methodologies to produce business value.
- Designed and deployed full-stack web applications using Node and Express, with custom MathJS units, integrated APIs, authentication, server-side rendering with EJS, and MongoDB database.
- Deployed apps with Heroku using CI/CD.

#### Full Stack Web Developer

Ashtar Creative Consulting

10/2020 – present  
Yonkers, NY

- Create responsive web applications and static websites for local small businesses.
- A recent client project is available at <https://themtb.netlify.app> [🔗](#)

#### Wordpress Assistant

Food Heaven Made Easy, LLC.

01/2019 –  
04/2020  
Bronx, NY

- Implement design improvements to the WordPress blog. Implement custom CSS, and WP plug-ins.
