PROFESSIONAL EXPERIENCE

Software Engineer | Platform Team

JP Morgan Chase

02/2022 – present
New York City

- Own a graphical interface tool for authoring JSON schema documents, used to manage the design artifacts of an in-house UI design system.
- Conducted a large-scale refactoring of this app to make it production ready and managed the launch of the tool.
- Improved app load times and server response times for two internal tools which have over 1000 users.
- Tools: React.js, Node.js, Express, Figma, Jest, Cypress

Full Stack Software Engineer

Teksystems

09/2021 – 01/2022
New York City

- Work on the UI component design system for a major financial firm.
- Have led an initiative to design a component conversion tool that teams use to save hours of time per manual conversion of their components to the new design system.

Software Engineer

100Devs

04/2020 – 08/2021
Los Angeles, Ca

- Build responsive web applications, applying agile methodologies to produce business value.
- Designed and deployed full-stack web applications.
- Tools: React.js, Node.js, Express, MongoDB, Ejs.
